CAREER SUMMARY

Throughout my career I touched a broad variety of technologies and I enjoyed every single bit of it. Now, when I am older I know I am unable to be professional at everything I'm interested in.

That's why I try to improve my skills mainly in Linux as operating system environment and Python ecosystem as a primary programming language. These two segments bring me maximum joy in learning and improvement.

WORK EXPERIENCE

- 04.10.2013 - till now **owner**
it7 s.r.o.
